## INSTRUCTIONS FOR USING THIS DATABASE

Note: Some of the search features may not work on older versions & Mac versions of Excel

### How to Perform a Search:

#### Method 1. Quick Search and Retrieval (Data Filter) Recommended Method

1. Click the corresponding pull down menu on the Title Bar in Row 4.  
For example, if you wanted to find all references to 3D printing, click the pull down box at the lower right corner of the heading "Topic" cell.
2. Type part of a word, a whole word or more than 1 word in the Search Box in the pull down menu. A list of possible matches will appear at the bottom of the pull down menu as you type.
3. When you are satisfied with your selection, press "enter" on your keyboard
4. When you are finished your search, re-open the same pull down menu and click "clear filter from . . ."

#### Method 2. Quick Search Using "Find"

1. Press simultaneously the "Ctrl" and "F" keys on your keyboard  
**OR**, from the home menu at the top, select Find & Select, then pick "find"
3. Type the key word in the Find What window
4. Pick Find All to list or Find Next to scroll through

#### Method 3: Performing a Custom Sort:

1. Type the word **Data** in the NAME BOX at upper left corner above spreadsheet
2. Press enter (this will highlight the entire data base).
3. From the Home menu at top, select "Sort & Filter"
4. Click "Custom Sort"
5. Make sure "My data has headers" at top right is **not checked**.
6. From the Column "Sort By" box pull down menu, select which Column is to be used for the basis of the 1st order of sort.
7. Fill in the other search criteria in the Sort on and Order boxes as needed.
8. Add another level of sorting if desired
9. A window will open, pick "sort anything that looks like a number, as a number"

For example, to produce the sort shown here, which shows each presenter and their presentations: My level 1 sort was Column E and my second level sort Column B.

To set the data base back to the original order, run a level 1 sort on column A, or click the **Blue Reset button** near the top of the table. **To run this feature, you need to enable macros in Excel. To do this:**

1. When the message bar appears, click Enable Content to enable macros.

Updating the Database - Administrator Only (to be revised)

This database is set up to accept 5000 rows of data. In the unlikely event that more rows will be

ch box.

**needed, it will be necessary to update the Named Range (i.e. for Data) and the Reset Macro.**

**Instructions for changing a Named Range**

1. On the Ribbon, click the Formulas tab.
2. Click Name Manager.
3. In the list, click on the name that you want to change.
4. In the Refers To box, change the range reference, or drag on the worksheet, to select the new range.
5. Click the check mark, to save the change.
6. Click Close, to close the Name Manager TOP.

**Instructions for updating the "Reset Button" macro:**

1. On the Ribbon, click the View tab.
2. Click on Macros
3. Click on "View Macros"
3. Highlight Reset2
4. Click "Edit"

The last number in each of the following instructions then needs to be changed to the last row # of the updated database. In the example below, the two values showing 5000 would have to be changed.

```
ActiveWorkbook.Worksheets("Sorted").Sort.SortFields.Add2 Key:=Range("A5:A5000" _
.SetRange Range("A5:E5000")
```

5. To save the changes click the red X at the top right of the edit box.
6. Click the "x" at the top right of the open window.

**For assistance, call Jared Fein - (905) 842-0819**
